Hannover, den

Dec. 14, 96

Dear Mr. Meyer,

thank you kindly for your envoy.

The enclosures will certainly interest you.

I may also attract your attention to the last two Brochures of this association, Nos. 33 and 34, in which I refer to the tested overunity effect of your technology. These will be available as copies from the A. Keith Brewer Sc. Library. (See enclosure _)

We are now preparing for the EXPO 2000 World exhibition in Hannover, June thru October, 2000.

We will present there the modalities of the conversion of Vacuum Field Energy on which also your procedure is based on. You are highly welcomed to present your technology there, along with others.

Please let us stay in close contact for this particular reason. About 40 Mio. people are expected to come. !!

With my best regards

Sincerely

(Dr.H.A.Nieper)

President, The German Association of Vacuum Field Energy
